## Introduction

Compiled by the Caribbean Disaster Risk Management, IFRC, this catalogue collects the disaster risk reduction trainings organized by the International Federation of Red Cross and Red Crescent Societies (IFRC) and its partner organisations, which are open to staff and volunteers of National Societies, IFRC, ICRC and partner organisations.

This catalogue does not exhaust the disaster risk reduction trainings offered by the RCRC Movement and is one of the learning tools available to National Society Presidents and Director Generals, Heads of Risk Management or Relief Departments, Disaster Risk Reduction Project Managers and Disaster Risk Management Officers.

For further information on additional training available, please review the RCRC Online Training Catalogue and the Catalogue of Emergency Trainings indicated in Annex I and II.

The background of the entire page features a complex, abstract network diagram. It consists of numerous small, dark grey circular nodes connected by thin, light grey lines. The nodes are distributed across the page, with a higher density in the top and bottom sections. The lines form a web-like structure, with some nodes acting as central hubs connected to many other nodes, while others are more isolated. The overall effect is a sense of interconnectedness and complexity.
